Algal Toxin Dipstick Kits

**Only
\$695
[Pack of 5]**

Lateral flow test strip kits are simple to use and provide qualitative answers in less than an hour.

Because they do not require complex or costly equipment, they are ideal for field-based and on-site screening applications including volunteer monitoring.

Other advantages include:

- Rapid screening for on-site decisions
- Semi-quantitative/qualitative results
- Answers in <1 hour
- No prior lab experience required
- Field-friendly: no complex or costly equipment required
- Kits conveniently stored at room temperature
